

ACO Passavant - Lipumax

Case Study

Asian Kitchen Tingalpa - Brisbane QLD

Asian Kitchen Tingalpa is a new tenant at Twin Parks Shopping Centre on Wynnum Road in the Brisbane bayside suburb of Tingalpa. The centre benefits from a high-traffic location, with thousands of vehicle movements daily from multiple access points. Asian Kitchen Tingalpa specializes in authentic cuisine from Southeast Asia, including Thailand, China, Indonesia, and Malaysia.

Project Design Brief

Transitioning from a previously non-restaurant tenancy, the owners of Asian Kitchen Tingalpa were required to install a grease trap in compliance with Queensland Urban Utilities regulations for trade waste. The installation presented significant challenges due to limited available space adjacent to the commercial kitchen and constrained external areas.

ACO's Solution

- **Lipumax** 1000L Grease Trap

Benefits

- Manufactured from durable polyethylene, the separator body provides excellent corrosion resistance.
- Lipumax body units are engineered to resist hydrostatic forces generated from changing ground water levels.
- Featuring a narrow oval shape, the Lipumax body unit installs in a small footprint, minimizing the deconstruction of hard stand and shortening overall installation time.
